

Mašine za blister pakovanja za
**JEDNOKRATNE MEDICINSKE
PROIZVODE**

Experience and knowledge we have acquired in almost **40 years of business activity** enable us to provide on a daily basis **tailor-made and high-tech solutions** for the packing of disposable medical products like syringes, needles, catheters, filters, gauzes, surgical kits, valves, cannulas, phials and much more.

We offer automatic Blister Packing Machines designed and built in order to be used in cleaning rooms.

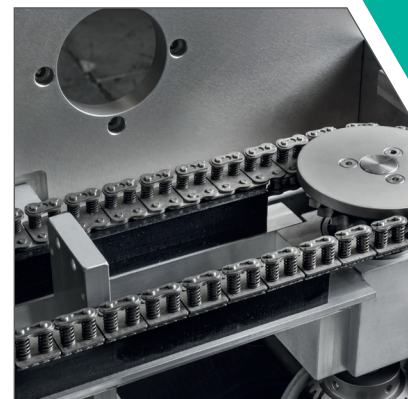

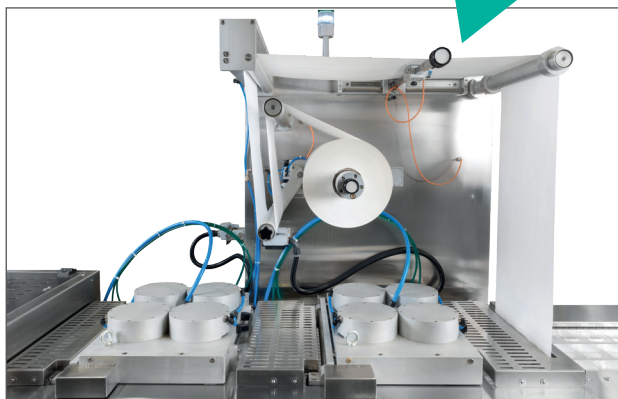

You have the possibility to use rigid films, flexible films, multi-layer aluminum films, medical paper and Tyvek® in order to be able to access to the following sterilization procedure.

You can choose the option to get only trays up to 1 mm of thickness, without top sealing.

We have a **wide range of printers** depending on the required application.

There is the possibility to **install in-line labelling** systems in order to apply labels both above and below the packages.

If necessary, we can offer machines that produce **packages in modified atmosphere and/or under vacuum** for particular applications.

Iskustvo i znanje koje smo stekli u skoro **40 godina poslovanja** omogućavaju nam da svakodnevno pružamo prilagođena i **visokotehnološka rešenja za pakovanje** medicinskih proizvoda za jednokratnu upotrebu kao što su špricevi, igle, kateteri, filteri, gaze, hirurški kompleti, ventili, kanile, bočice i još mnogo toga.

Nudimo automatske mašine za blister pakovanje dizajnirane i napravljene da se koriste u prostorijama za čišćenje.

Imate mogućnost da koristite krute folije, fleksibilne folije, višeslojne aluminijumske folije, medicinski papir i Tivek® kako biste mogli da pristupite sledećoj proceduri sterilizacije.

Možete izabrati opciju da dobijete samo tacne do 1 mm debljine, bez gornjeg zatvaranja.

Imamo **širok spektar štampača** u zavisnosti od zahtevane primene.

Postoji mogućnost ugradnje **in-line sistema etiketiranja** kako bi se nalepnice nalepile i iznad i ispod pakovanja.

Po potrebi možemo ponuditi mašine koje proizvode **pakovanja u modifikovanoj atmosferi i/ili pod vakuumom** za posebne primene.

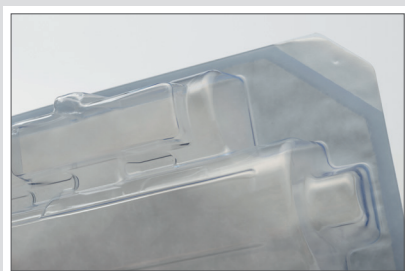

Since 1979, AL.MA. has met the national and international market demands **producing only on order** to minimize waste deriving from used wrapping materials and boost the packaging of each product.

The entire manufacturing process is done within the company: from design and engineering to production of all the mechanical components; from design of the electrical cabinet and its wiring to the implementation of the on-board machine system; from the assembly of all parts to the PLC programming and final testing.

Od 1979. AL.MA. je ispunio zahteve domaćeg i međunarodnog tržišta u **proizvodnji koja smanjuje** otpad koji nastaje od korišćenih materijala za pakovanje i poboljšanja pakovanja svakog proizvoda.

Ceo proizvodni process mašina se odvija u okviru kompanije: od projektovanja i inženjeringa do proizvodnje svih mehaničkih komponenti; od projektovanja električnog ormara i njegovog ožičenja do implementacije sistema na mašini; od montaže svih delova do programiranja PLC-a i završnog testiranja.
